ARE YOU TIRED OF PAYING HIGHER SEWER CHARGES?

THEN...
YOU MUST READ THIS
NOTICE!

**Save money on your annual sewer assessment! Make
time to fix all leaks today and save!**

December 2018

Are you aware that your sewer service charge for the entire fiscal year is **STILL** based on how much water you use during the January and February meter reading period? **YES!**...you can still have control of how much your sewer charges will be for the next fiscal year! **Minimum annual sewer charge of 12 units applies (or 2 units per base period x 6 billing periods).**

Lowering your sewer charges is easy to do, but must be done NOW! All YOU have to do is reduce YOUR water usage as much as YOU can from January 3 through March 5, 2019 (**meter reading is dependent on weather conditions**). The sewer charges on your annual property tax bill for fiscal year 2019/2020 will reflect YOUR savings based on the amount of water YOU have conserved during the Jan-Feb. 2019 period (**12 unit minimum annual sewer charge applies**).

NOW is the time to check all household plumbing fixtures and repair those that are leaking. Leaky faucets and silent toilet leaks can cause your water bill and sewer service charge to **MORE THAN DOUBLE**. You can easily check your residence for plumbing leaks by using a **free** packet of toilet dye strips from our office. Please call, e-mail, or visit our website for more information.
